

TES 28 MAGNAM

TES 28 MAGNAM

TES 28 MAGNAM - has all features from other TES boats and new and proven solutions were added. She combines the portability of smaller models with the space and comfort of the Dreamer 32. The cabin space provides space for head with shower space, full galley, space for inboard with bow and stern cabins. Lots of light and great ventilation is given by 5 deck hatches. Cockpit with high coamings is enclosed at the stern by liftable seat and huge optional swim platform. The owner can decide on the version and character of the Magnam to make her the yacht of his or her dreams. The trailerable version and access to shallow waters dictate the need for the swing centerboard, while blue waters cruising with lots of depth would suggest fitting with the keel. Tiller or wheel steering, and outboard or inboard motor version are possible for Magnam. As typical for all TES boats, rigid and solid hull laminated with deck, great stability assured by the design and inboard ballast provide safe and the fastest environment from within all TES boats

SPECIFICATIONS:
